For $41 a quarter, students are able to fund both large and small technologies, such as:

- Over 200 iMac workstations in Odegaard Library
- U-Drive Cloud Storage for all students
- Ionization Source for Department of Chemistry
- Equipment for the Undergraduate Theater Society
- Clickers for the ASUW Senate
- Space Scout App
- Computer Labs across campus
- Microsoft Software for all students
- Next Generation Sequencing Pipeline for the Biology Department
- Hardware and Software for The Daily Newspaper
- Equipment for Earth and Space Sciences
- Graphics Processing Units for Applied Mathematics

Technology purchased with the fee has greatly enhanced the experience on campus, inside and outside the classroom, for varying segments of the student population. STF was established to supplement student life on campus. It is a very necessary fee because Federal and State funding for the University of Washington does not fund the level of technology that STF provides. The fee serves to bridge the gap between what the university is capable of providing and what students bring themselves.

The Committee has been able to provide hardware, software, high-end machines, and research equipment for various departments and student life. These technologies are used every day by every student at the University of Washington.

Without student’s providing this fee every quarter, there would be a marked decrease in the quality of technology on campus, in the classroom, around campus, and within various departments.

For any questions regarding the Student Technology Fee or benefits for students, please contact:
